“Features 105 specimens of auto exotica.... An interesting examination of automotive esoterica”—Vintage Roadcar “This is exactly the sort of material that take you back to the fifties, or shows you what the streets of Europe looked like at that time. Cagle has meticulously researched the cars in this book...his style of writing is pleasant, informative and humorous. He avoids the usual mistakes you can find on the Internet, and paints the wider picture, without becoming pedantic”—Rumcar News

Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare

and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle’s Iloca Rapid-B 35mm camera—not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle’s personal anecdotes. *Popular Mechanics* 2000-07 *Popular Mechanics* inspires, instructs and influences readers to help them master the modern world. Saab 96 & V4 Graham Robson 2010-04-15 The front-wheel-drive Saab 96 made the brand into a rally icon in the 1960s. It succeeded in events as diverse as the Monte Carlo, Britain's RAC rally, special stage events in every Scandinavian country, and the rough-and-tough Spa-Sofia-Liege Marathon. The big change came in 1967, when the 96 became the V4. Works cars continued to be competitive in carefully chosen events for many years, and when they became outdated, the V4's successors – the much larger and more powerful 99 and 99 Turbo types – proved that Saab wasn't done with rallying yet. More than any other car of its era, the 96 and V4 models proved that front-wheel-drive allied to true superstar driving could produce victory where no-one expected it.

Phil Edmonston 2012-05-19

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in

profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from

evolving into the 93, 96 2-stroke and 96V4, this car was in production for thirty-one years. Attracting global admiration and sales, it also excelled in motorsport and by the early 1960s was the most successful rally-car in Europe. A decline in sales in the 1960s was reversed with the launch of the 96V4 which resulted in its success continuing into the 1980s. With over 200 archive and colour photographs, this book provides a new description of the Saab company's original car and includes detailed biographies of important Saab figures and extensive discussion of the engineering and design decisions that made the car such a success. There is coverage of the original Saab story in North and South America and a comprehensive review of Saab 92, 93, 96, motor sport history. Full technical details and specifications and tuning details are given and finally, there is a

chapter on owners' experiences and Saab veteran's recollections.

Customer-Oriented Quality Management in the

Automotive Industry Marit

Breitfeld 2005-02-28

Inhaltsangabe:Abstract: In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive advantage.

Quality controls along the whole value chain -before, during and after production- leads to failure free products, which save costs on the one hand and have thus a positive influence on the company s revenue. On

the other hand failure free products that meet the customers expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales, which have a positive influence on the company s sales, market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customers and get an insight in the customer s needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction, which is a key to success in today s business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore the producers are forced to keep to the latest technology developments and to get hold on the changing customer needs. But even without this

external pressure, quality improvement is justified from a cost point of view. The applicability of a customer-oriented quality management is shown in the practical part of this thesis, when the quality of the Saab models is analyzed from the customer s perspective. Due to the arguments, outlined in this thesis, it can be summarized that a quality management with a focus on the needs of the customers in should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business. This thesis deals with the field of quality management in the context of customer satisfaction. To show the practical applicability of quality management, this thesis is looking at how quality management is conducted in the automotive industry, as we compare the Initial Quality Study (IQS) from the market research institute J. D. Power with a

survey that was internally conducted at the Saab Automobile AB. Today's business environment creates a growing need for quality management.

Tougher competition leads to the demand for cost savings and higher [...]
