The Psychology of Attitudes and Attitude Change Greg Maio 2009-12-18 'An outstanding new text. Written in an engaging style it provides an impressive review of both basic and applied work. Classic studies are interwoven with important recent findings to provide a scholarly overview of this exciting area of social psychology' - Professor Mark Conner, University of Leeds 'Maio and Haddock provide an excellent up-to-date summary of the key findings in the field in their very readable new text' - Richard E. Petty, Ohio State University People spontaneously evaluate things. We form opinions on topics such as war and climate change, on other people such as our work colleagues and celebrities, and on behaviours such as sexual activity and waste recycling. At times, these attitudes can be the focus of bitter debate, and as humans we naturally crave to understand attitudes and how to change them. In four sections and 11 chapters, Greg Maio and Geoffrey Haddock describe how scientific methods have been used to better understand attitudes and how they change. The first section looks at what attitudes are and why they are important. The second section examines the ability of attitudes to predict behaviour. From there, the authors consider how attitudes are formed and changed. Finally, they present a variety of major issues for understanding internal (such as, neurological) and external (such as, culture) influences on attitude, along with unresolved questions. With the aid of a few helpful metaphors, the text provides readers with a grasp of the fundamental concepts for understanding attitudes and an appreciation of the scientific challenges that lie ahead. The

Psychology of Attitudes and Attitude Change is for students in psychology, health psychology, communication, business and political science. It is a core text for courses in the psychology of attitudes, persuasion, and social influence and a key resource for modules in social cognition and introductory social psychology

Combining Jon Ronson's trademark humour, charm and investigative incision, The Psychopath Test is both entertaining and honest, unearthing dangerous truths and asking serious questions about how we define normality in a world where we are increasingly judged by our maddest edges.

**The Global Findex Database 2017** Asli Demircug-Kunt 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global

Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

The Illustrious Dead Stephan Talty 2009 The *Illustrious Dead* is another triumph of narrative nonfiction from the author of the *New York Times* bestselling *Empire of Blue Water*. In the spring of 1812, Napoleon was at the height of his power. Forty-five million called him emperor. Unstoppable in his relentless pursuit of territory and authority, he held sole command of a nation that was the richest and most potent on earth, the most cultured, the furthest advanced in medicine and science and technology; In that fateful year, Napoleon turned toward Moscow at the helm of the largest invasion force in the history of mankind. His army was a thing of martial beauty, honed by constant warfare and brilliantly led. No army on earth could stop Bonaparte from conquering the world. But there was something waiting in the Russian steppes that would test Napoleon to his limit and bring his dreams of a world empire to a shocking close. It was not a brilliant general or an unseen alliance, but the tiny typhus microbe. The *Illustrious Dead* tells the tale of these two unstoppable historical forces meeting on the road to Moscow in a clash of

killer pathogen and peerless army.

### **User Interfaces for All** Constantine

Stephanidis 2019-03-30 *User Interfaces for All* is the first book dedicated to the issues of Universal Design and Universal Access in the field of Human-Computer Interaction (HCI). Universal Design (or Design for All) is an inclusive and proactive approach seeking to accommodate diversity in the users and usage contexts of interactive products, applications, and services, starting from the design phase of the development life cycle. The ongoing paradigm shift toward a knowledge-intensive information society is already bringing about radical changes in the way people work and interact with each other and with information. The requirement for Universal Design stems from the growing impact of the fusion of the emerging technologies, and from the different dimensions of diversity, which are intrinsic to the information society. This book unfolds the various aspects of this ongoing evolution from a variety of viewpoints. It's a collection of 30 chapters written by leading international authorities, affiliated with academic, research, and industrial organizations, and non-market institutions. The book provides a comprehensive overview of the state of the art in the field, and includes contributions from a variety of theoretical and applied disciplines and research themes. This book can also be used for teaching purposes in HCI courses at the undergraduate as well as graduate level. Students will be introduced to the human-, organizational-, and technology-oriented dimensions that call for a departure from traditional approaches to user interface development. Students will also get an overview of novel methods, techniques, tools, and frameworks for the design, implementation, and evaluation of user interfaces that are universally accessible and usable by the broadest possible end-user population. This comprehensive book is targeted to a broad readership, including HCI researchers, user interface designers, computer scientists, software engineers, ergonomists and usability engineers, Human Factors researchers and practitioners,

organizational psychologists, system/product designers, sociologists, policy- and decision makers, scientists in government, industry and education, as well as assistive technology and rehabilitation experts.

**A Taxonomy for Learning, Teaching, and Assessing** Benjamin Samuel Bloom 2001  
This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
