The Girls With Kaleidoscope Eyes Howard V. Hendrix 2019-08-13 Ranging from flash to full novella lengths, the ten pieces featured here include stories about time travel and the 1939 World's Fair, a tendentious man/dog relationship on Mars, a spam-blocker program that incidentally shuts down the universe, giant artworks among the nearly immortal, Einstein channeled by a fortune teller, Big Data meets March Madness, and enhanced bonobos trying to re-create Shakespeare's lost play Cardenio. Hendrix's stories transcend time and show us the futures the human race yet may face, in the digital age and beyond.

On Earth We're Briefly Gorgeous Ocean Vuong 2019-06-20 THE TIKTOK SENSATION 'A marvel' Marlon James Brilliant, heart-breaking and highly original, discover Ocean Vuong's shattering coming of age novel. This is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family's history that began before he was born. It tells of Vietnam, of the lasting impact of war, and of his family's struggle to forge a new future. And it serves as a doorway into parts of Little Dog's life his mother has never known - episodes of bewilderment, fear and passion - all the while moving closer to an unforgettable revelation. 'Reminded me that every word can be an incantation, and that beauty does hard and important work' Rebecca Solnit

Peony in Love Lisa See 2011-05-04 Peony has neither seen nor spoken to any man other than her father, a wealthy Chinese nobleman. Nor has she ever ventured outside the cloistered women's quarters of the family villa. As her sixteenth birthday approaches she finds herself betrothed to a man she does not know, but Peony has dreams of her own. Her father engages a theatrical troupe to perform scenes from *The Peony Pavilion*, a Chinese epic opera, in their garden amidst the scent of ginger, green tea and jasmine. 'Unmarried girls should not be seen in public,' says Peony's mother, but her father allows the women to watch from behind a screen. Here, Peony catches sight of an elegant, handsome man and is immediately bewitched. So begins her unforgettable journey of love, desire, sorrow and redemption.

[Stone Medicine](#) Leslie J. Franks 2016-02-13 A comprehensive manual for using crystals, gems, and stones to address physical, emotional, and spiritual health conditions • Includes an extensive *Materia Medica* detailing the healing and spiritual properties of 200 crystals and stones based on Classical Chinese Medicine • Explores the role played by the color of each stone, its Yin and Yang qualities, crystalline structure, chemical composition, and topical and internal applications • Explains how to make stone and crystal elixirs, wear stones as healing jewelry, use them in massage and energy work, and cleanse and recharge them • Based on the oral teachings of Dr. Jeffrey C. Yuen, a Taoist priest from the ancient lineage of the Jade Purity School (88th generation) masters In addition to herbalism and acupuncture, Chinese Medicine has a rich tradition of using stones as medicine, passed from generation to generation for thousands of years. In this comprehensive guide and extensive *Materia Medica*, Leslie J. Franks presents the Stone Medicine teachings of Dr. Jeffrey C. Yuen, an 88th generation Taoist priest from the ancient lineage of the Jade Purity School, which dates to the Han dynasty, 206 BCE. Detailing the therapeutic properties of 200 gems, stones, minerals, and crystals, Franks begins with an extensive look at 15 different forms of quartz, followed by chapters on transformative stones, protective stones, nourishing stones, source energy stones, and alchemical stones. She explains the physical, emotional, and spiritual conditions each stone can treat and how their color, form, hardness, and energetic qualities affect us according to Chinese Medicine. She discusses how to make stone and crystal elixirs for internal and topical use, how to charge quartz with the healing properties of other stones, how to cleanse and recharge a stone after use, and how to combine stones to create healing formulas for individual conditions. She explains different

techniques of wearing stones as healing jewelry and how to use them in massage and energy work. She examines the chemistry and sacred geometry of crystal structure, revealing how the minerals contained in the stones affect our physiology by supporting our Jing (Essence); by nourishing Qi (energy), blood, and fluids; and by clearing Wind, Cold, Damp, and Heat conditions that can lead to disease. Including a thorough primer on Traditional Chinese Medicine and backed by modern scientific research, this book explains how stones access our deepest layers, vibrating ever so slowly, to initiate deep lasting change.

Kaleidoscope Helen M. Luke 1992 At an age when most people would be thinking about retirement, Helen M. Luke embarked on two new careers, helping found the Apple Farm Community, a retreat and study center near Three Rivers, Michigan, and simultaneously making her debut as a writer, drawing on a lifetime of spiritual and psychological counseling. These essays, published over the past three decades, show the breadth of Luke's experiences as a Jungian psychologist, lecturer, and author. The collection is divided into three sections, indicative of three main streams in Luke's own thinking: her distinctive viewpoint as a woman who has lived through and observed every decade of the present century; the importance of Anglo-Catholicism as a touchstone for responsibility and discrimination in her search; and her lifelong love of examining the world's great literature as a route towards knowledge. Luke's ideas are often iconoclastic to contemporary attitudes of sexual politics, religious dogma, and literary interpretation: her approach is individual and unique, rigorous and refreshing, as she combines these three paths--the way of woman, the way of discrimination, and the way of story--into a kaleidoscope of the inner journey so necessary to us all.

The Entire Earth and Sky Leslie Carol Roberts 2008 More than a distant continent, Antarctica is a land of the imagination, shaping and shaped for centuries by explorers, adventurers, scientists, and dreamers. The Entire Earth and Sky conjures all these ideas and interweaves them with the experience and history of Antarctica, balancing the reality of the frigid outpost populated by a ragtag alliance of international researchers against the crystalline dreamscape of a continent at the bottom of the world. When Leslie Carol Roberts went to Antarctica for the first time with Greenpeace, she was hoping to save the world. In the twenty years since then she has shifted to the no less difficult task of saving Antarctica itself, compiling memoirs and stories, learning the biology and geography of the icy land, and documenting her own journey. This book pieces together the tragic and heroic tales of nineteenth-century exploration, interviews with scientists, and the author's personal observations. The result is a remarkable collage that evokes the beauty and the complexity, the perils and the rewards of a lifelong engagement with the earth's last wilderness. A kaleidoscope of legends, stories, field notes, images, reports, history, letters, and research, the book renders an impression, at once vast and microscopic, of the effect of human beings on the land and ice we call Antarctica, and its effect on us.

Blue Planet II Leisa Stewart-Sharpe 2020-11-05 With a foreword from David Attenborough. This is our Blue Planet: a beautiful blue marble suspended in a sea of stars. Dive into these incredible stories from BBC Blue Planet II. Unlike billions of other worlds in the Milky Way, 71 per cent of our Blue Planet is covered by ocean. It's home to the greatest diversity of life on Earth but is our least explored habitat; we've better maps of Mars than of the ocean floor. With so much more to discover, take a deep breath . . . and dive into a wondrous world beneath the waves. Explore coral reefs that shimmer in a kaleidoscope of colours. Venture to the bottom of the ocean where creatures beyond your wildest imagination live in the dark. Chase sea otters through kelp forest seas, and glide the open ocean with humpback whales. Discover all there is to love about our Blue Planet, the stories of its inhabitants, and realise how you can help protect this wilderness beneath the waves. In collaboration with BBC Earth, this illustrated non-fiction book captures the wonder, beauty, and emotion of the iconic BBC Blue Planet II TV series.

The Dying Earth Jack Vance 2011-11-14 New races of man had evolved, new species of beast; science had vanished and magic had arisen to dominate the twilight of our world as it dominated the earth's morning. The Dying Earth is Jack Vance's finest work - a stunning evocation of a world peopled by wizards, witches, demons, monsters, dashing princes and forlorn maidens. A bejewelled gallery of strange and wonderful beings in the eminent tradition of Tolkien and William Morris. Jack Vance's preferred title for this collection is Mazirian the Magician, but while we have elsewhere deferred to his wishes, in this case the book is so famous under a title of which he apparently strongly disapproves that we concluded it would be absurd to change it. All Jack Vance titles in the SFGateway use the author's preferred texts, as restored for the Vance Integral Edition (VIE), an extensive project masterminded by an international online community of Vance's admirers. In general, we also use the VIE titles, and have adopted the arrangement of short story collections to eliminate overlaps.

Kaleidoscope of Creatures Cath Ard 2021-02-16 Why are animals so amazingly colorful? Find out in this kaleidoscopic look at the technicolor world of animals. Meet animals of every color of the rainbow and find out why they are the colors and patterns they are. Discover the reason why some animals are stripy and others are spotty. Why do some creatures deliberately pop out while others strive to blend in? Why are some bright to warn off others while some only pretend to look toxic? Why are some male animals so much more flamboyant than their female counterparts? Why do some babies look so different from the grown-ups in their families? The animal kingdom is explored like never before in this richly detailed natural history book, bursting with life and color. This is a beautifully illustrated first look at the colorful and kaleidoscopic world of animals for young children.

The Antarctica of Love Sara Stridsberg 2021-09-30 "A haunting portrait of the starkest meanings of love and family. Stridsberg's literary talent left me

awestruck" Kate Reed Petty, author of True Story "A disturbingly beautiful book" Expressen **A Financial Times Book of the Year 2021** They say you die three times. The first time for me was when my heart stopped beating beneath his hands by the lake. The second was when what was left of me was lowered into the ground in front of Ivan and Raksha at Bromma Church. The third will be the last time my name is spoken on earth. Inni lives her life on the margins, but it is a life that is full and complex, filled with different shades of dark and light... Until she is brutally murdered one summer's day, on a lake shore at the heart of a distant, rain-washed forest. On the surface, this is the story of the moment her life is violently extinguished - a moment that will never end, not ever - but it is also about the time before, and about the lives that carry on afterwards. It's about her children, her parents, her childhood of neglect, her volatile adolescence, and the chain of choices, tragedies and accidents that lead her to a life on the streets and take her into the wrong crowd, the wrong places and, finally, the wrong car with the wrong person. Sara Stridsberg's new novel is about absolute vulnerability, brutality and isolation. At times disturbing, this is a devastating story of unexpected love, tenderness and light in the total darkness. Translated from Swedish by Deborah Bragan-Turner

Earth's Angels Beth Worsdell 2018-10-20 We should have known someone or something, would step in and save our planet. Who could blame anyone, for trying to save the planet we'd been steadily destroying for centuries! Let's face it, we couldn't possibly be the only inhabitants of a planet in the whole universe. When Mel wakes in a hospital type environment, she doesn't know where she is or who she is. It's a total shock for her, to not only discover that angels are real, but that she and the other human survivors will be helping the ancient alien angels, to not only save the animal kingdom, but the human race and Earth in truly amazing and magical ways. Once reunited with her husband and older children Anthony, Holly, Harrison and Abigail, her family are introduced to magic that they didn't know our planet held. The magical and beautiful angels are healers of planets, a peaceful and gentle race with amazing powers. Imagine finding out that ancient aliens are real, and that the tales of humans and angels working together actually happened. Now the angels and humans have to work together again, to heal the planet we nearly destroyed. The angels power is a special kind of magic, that also brings Earth's ancient ruins back to life, by mending and reactivating our planets ancient defenses around the world. These defenses will be needed as the Marilians are coming. They have decided to follow the angels to Earth and they are now wanting to take Earth and the humans as their own. The humans and angels have two missions. To prepare for the upcoming battle and heal our planet.

Turkish Kaleidoscope Jenny White 2021-05-04 "When Jenny White arrived in Turkey in 1975 to pursue a master's degree in Ankara, she had no idea that the country and her university were already embroiled in a vicious civil war ... In the simple everyday act of attending class, she encountered armed personnel carriers, bullets, bombs, and other dangers. By the time she left in 1978, the polarized fury of street violence between groups professing 'leftist' and 'rightist' views had enveloped the entire country ... Based on the author's personal experiences and her in-depth oral history interviews with older Turks who lived through that tumultuous period--and informed by her years of ethnographic research in that country--this graphic narrative book explores the origins of political factionalism and its descent into violence in 1970s Turkey"--

Kaleidoscope Century John Barnes 2010-04-01 Joshua Ali Quare wakes in 2019 at the age of 140 in a strong youthful body with no memory of his past, to find he is at the center of a vast and deadly conspiracy. The only clues to his identity are the records he has left--messages from the man he once was... As Quare journeys through his past, he discovers he has been a key figure in the history of a turbulent, violent century--soldier, criminal, assassin, spy. A century filled with killing plagues and warring cults, ruthless corporations and dying nations. A century where treachery is often the only way to survive. Now someone is looking for him. Someone from his past. And Quare must learn the terrifying secret of his history before it unleashed devastating consequences for the future of the human race. Kaleidoscope Sky Tim Herd 2007-11 A magical, illustrated tour of nature's wondrous, almost supernatural skies, Kaleidoscope Sky reveals the beauty—and the science—behind Earth's rarest, most unusual celestial phenomena. For millennia, the sky has provided a spectacular show with bright, quiet sunrises and fiery red sunsets, the wispy, whimsical patterns of clouds passing overhead, or the violent thrill of lightning flashing at night. In Kaleidoscope Sky, author Tim Herd explains to the armchair voyager the conditions that produce these everyday phenomena, as well as rarer sights including auroras, halos, mirages, arcs, and even moonbows (nighttime rainbows often too faint to capture on film). Although the subject is complex, Herd provides a clear, accessible guided tour of the fleeting, ephemeral works of art that populate the heavens' own natural museum. Herd's non-technical treatment reveals his own appreciation for (and wonder at) the awesome and wonderful palette of the sky above us. In addition to shedding light upon the causes of these unusual spectacles, Herd provides tips on the best ways to predict, locate, and observe these phenomena.

The Uninhabitable Earth David Wallace-Wells 2019-02-19 **SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live--the planet no longer nurturing a dream of abundance, but a living nightmare.

Enough About Love Hervé Le Tellier 2011-02-01 GONCOURT PRIZE-WINNING AUTHOR Any man—or woman—who wants to hear nothing—or no more—about love should put this book down. Anna and Louise could be sisters, but they don't know each other. They are both married with children, and for the most part, they are happy. On almost the same day, Anna, a psychiatrist, crosses paths with Yves, a writer, while Louise, a lawyer, meets Anna's analyst, Thomas. Love at first sight is still possible for those into their forties and long-married. But when you have already mapped out a life path, a passionate affair can come at a high price. For our four characters, their lives are unexpectedly turned upside down by the deliciously inconvenient arrival of love. For Anna, meeting Yves has brought a flurry of excitement to her life and made her question her values, her reliable husband, and her responsibilities to her children. For Louise, a successful career woman in a stable and comfortable marriage, her routine is uprooted by the youthful passion she feels for Thomas. Thought-provoking, sophisticated, and, above all, amusing, *Enough About Love* captures the euphoria of desire through tender and unflinching portraits of husbands, wives, and lovers.

The Illustrated Man Ray Bradbury 2012-04-17 Eighteen science fiction stories deal with love, madness, and death on Mars, Venus, and in space.
