**Wildcat Fireflies** Amber Kizer 2011 Half human, half angel, Meridian Sozu has a dark responsibility Meridian Sozu is a Fenestra - a human-angel link between the dying and the beyond. It is her calling to help souls safely make the transition into the afterlife. Though she appears human to the living, she is the light that the dying see as they prepare to leave this world. But she and all Fenestras are threatened by the Aternocti, dark forces who snatch souls from the Light and suck them into the void of Evil, causing chaos.

At Meridian's side, Tens Valdes, her Soul Mate and destined Protector, must learn his responsibilities not only to Meridian but also to the humans who need them. Still mourning their beloved Auntie—the woman who taught them everything they know—Meridian and Tens have hit the road seeking another Fenestra. Their search leads them from Colorado to Indiana, to a dilapidated facility called Dunklebarger that houses foster children and the dying elderly, as well as a corrupt system set up by the Aternocti to find young Fenestras. Dunklebarger is the only home Juliet remembers. Surrounded by death and illness, she struggles to make a loving home for the youngest kids and to protect them from the violent whims of the headmistress. As she nears her sixteenth birthday, Juliet's light and her will to escape weaken with each passing day . . . and she feels a seductive pull toward the dying, whose sickness seems to infect her, forcing her closer to the end . . . Will Juliet hang on long enough for Meridian and Tens to find her? Or will the Aternocti that lurk in the very house Juliet calls home get to her first?

**Virgil, Aeneid 11 (Pallas & Camilla), 1-224, 498-521, 532-96, 648-89, 725-835.** Ingo Gildenhard and John Henderson 2018-12-01 A dead boy (Pallas) and the death of a girl (Camilla) loom over the opening and the closing part of the eleventh book of the Aeneid. Following the savage slaughter in Aeneid 10, the book opens in a mournful mood as the warring parties revisit yesterday's killing fields to attend to their dead. One casualty in particular commands attention: Aeneas' protégé Pallas, killed and despoiled by Turnus in the previous book. His death plunges his father Evander and his surrogate father Aeneas into heart-rending despair - and helps set

up the foundational act of sacrificial brutality that caps the poem, when Aeneas seeks to avenge Pallas by slaying Turnus in wrathful fury. Turnus' departure from the living is prefigured by that of his ally Camilla, a maiden schooled in the martial arts, who sets the mold for warrior princesses such as Xena and Wonder Woman. In the final third of Aeneid 11, she wreaks havoc not just on the battlefield but on gender stereotypes and the conventions of the epic genre, before she too succumbs to a premature death. In the portions of the book selected for discussion here, Virgil offers some of his most emotive (and disturbing) meditations on the tragic nature of human existence - but also knows how to lighten the mood with a bit of drag. This course book offers the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and the most recent scholarly thought. King's College, Cambridge, has generously contributed to this publication.

Handbook on Personalized Learning for States, Districts, and Schools

Marilyn Murphy 2016-07-01 The recent passage of the Every Student Succeeds Act (ESSA) presents new opportunities and greater flexibility in efforts to personalize learning for all children. The Handbook on Personalized Learning for States, Districts, and Schools provides insight and guidance on maximizing that new flexibility. Produced by the Center on Innovations in Learning (CIL), one of seven national content centers funded by the U.S. Department of Education, this volume suggests how teachers can enhance personalized learning by cultivating relationships with students and their families to better understand a child's learning and motivation. Personalized learning also encourages the development of students' metacognitive, social, and

emotional competencies, thereby fostering students' self-direction in their own education, one aimed at mastery of knowledge and skills and readiness for career and college. Chapters address topics across the landscape of personalized learning, including co-designing instruction and learning pathways with students; variation in the time, place, and pace of learning, including flipped and blended classrooms; and using technology to manage and analyze the learning process. The Handbook's chapters include Action Principles to guide states, districts, and schools in personalizing learning.

**Dressing for Altitude** Dennis R. Jenkins 2012-08-27 "Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

It is therefore a question of ascertaining the character, function and place which Dante assigned to this branch of learning among the activities of man. My purpose has not been to single out, classify and list Dante's numerous philosophical ideas, still less to look for their sources or to decide what doctrinal influences determined the evolution of his thought.

**Jellyfish Blooms** Kylie A. Pitt  
2013-11-04 Jellyfish are one of the most conspicuous animals in our oceans and are renowned for their propensity to form spectacular blooms. The unique features of the biology and ecology of jellyfish that enable them to bloom also make them successful invasive species and, in a few places around the world, jellyfish have become problematic. As man increasingly populates the world's coastlines, interactions between humans and jellyfish are rising, often to the detriment of coastal-based industries such as tourism, fishing and power generation. However we must not lose sight of the fact that jellyfish have been forming blooms in the oceans for at least 500 million years, and are an essential component of normal, healthy ocean ecosystems. Here many of the world's leading jellyfish experts explore the science behind jellyfish blooms. We examine the unique features of jellyfish biology and ecology that cause populations to 'bloom and bust', and, using case studies, we show why jellyfish are important to coastal and ocean ecosystem function. We outline strategies coastal managers can use to mitigate the effects of blooms on coastal industries thereby enabling humans to coexist with these fascinating creatures. Finally we highlight how jellyfish benefit society; providing us with food and one of the most biomedically-important compounds discovered in the 20th century.

*Health Literacy* Who Regional Office for Europe 2013 As societies grow more complex and people are increasingly bombarded with health information and misinformation,

health literacy becomes essential. People with strong health literacy skills enjoy better health and well-being, while those with weaker skills tend to engage in riskier behavior and have poorer health. With evidence from the recent European Health Literacy Survey, this report identifies practical and effective ways public health and other sector authorities and advocates can strengthen health literacy in a variety of settings, including educational settings, workplaces, marketplaces, health systems, new and traditional media and political arenas. The report can be used as a tool for spreading awareness, stimulating debate and research and, above all, for informing policy development and action.

**On the Track of the Books** Roberta Berardi 2019-06-17 This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

**The Revenge of the Real** Benjamin Bratton 2021-06-29 The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? The Revenge of the Real envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with

multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new

rationality of inclusion, care, and prevention.
