Auto Repair For Dummies Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide—400,000 copies sold—now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

LIFE the World's Great Civilizations Editors of Life 2012-08-28 This is the pictorial history of the rise (and fall) of great nations, from the ancients to today. But this is not just Rome and the Incas and British imperialism-though it certainly includes them-but lesser known civilizations that are often relegated to a footnote, or forgotten altogether. The ancient Anasazi Indians of the American Southwest apparently enjoyed an agrarian lifestyle that, after they mysteriously disappeared, would not be realized again on this continent for many generations. The natives of Easter Island sealed their own doom with a kind of communal hysteria that remains unclear. Several cultures put their mark on England's Stonehenge, and peeling the layers of that story is like parsing the experience of a very old tree, ring by ring. Of course the ages of empire are recounted: Egypt, Greece, Rome, China, Russia, Great Britain. We journey, photographically and archeologically, through Troy, and also the Mediterranean islands of Gnossos and Santorini (was this where Plato's Atlantis thrived before the cataclysm)? We climb to Machu Piccu, and trek to Australia to revisit the island continent when it belonged to its Aborigines. Obviously, many of the great civilizations belong to history, experiencing their glory before the advent of photography. There are no pictures of Alexander the Great or Genghis Khan or Napoleon beyond the painted ones. But there are many photographs of the civilizations they built and ruled, many of which were made for LIFE magazine, which looked at this story often. Near our book's end, we arrive at the ongoing narrative that is the United States of America: today's great

civilization, built on a system called democracy. Our history and prospects are all the more fascinating when put in relief against the stories of all previous great civilizations.

Global Status Report on Road Safety 2018 World Health Organization 2019-01-10 The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years.The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.
