This book investigates the problems and possibilities of plural legal orders through an in-depth study of the relationship between the state and customary justice systems in Vanuatu. It argues that there is a need to move away from the current state-centric approach to law reform in the South Pacific region, and instead include all state and non-state legal orders in development strategies and dialogue. The book also presents a typology of models of engagement between state and non-state legal systems, and describes a process for

analysing which of these models would be most advantageous for any country in the South Pacific region, and beyond.

practical remedy to this dilemma. *A Guide to the Dead Sea Scrolls and Related Literature* starts by explaining the conventional system of abbreviations for the Scrolls. Then it helpfully lists specifically where readers can find each of the Scrolls and fragmentary texts from the eleven caves of Qumran and all the related sites, using the officially assigned numbers of the text. Fitzmyer supplies information on study tools helpful for scholars -- concordances, dictionaries, translations, outlines of longer texts, and more -- and briefly indicates electronic resources for the study of the Dead Sea Scrolls.

Financial Sector Development in Pacific Island Economies: Country reports Marian E. Bond 2001 Volume 1 assesses the state of financial sector development in seven of the 12 Pacific developing member countries of the Asian Development Bank (ADB). It consolidates the findings of individual country reports on the Fiji Islands, Kiribati, Papua

New Guinea, Samoa, Solomon Islands, Tonga, and Vanuatu, and recommends strategies for developing sound financial systems in the areas of macroeconomic policy, banking systems, nonbank financial institutions, financial markets, microfinance, and land tenure systems. Volume 2 specifically analyzes the attempts by Pacific developing member countries' governments to strengthen and develop their financial systems in order to promote economic development. They emanate from a regional technical assistance project that had the objective of formulating strategies for financial sector development, which would be the basis of a policy dialogue between the governments and ADB. Recommendations are of special relevance to the operations and management of central banks.

**The Perfect Summer** Morgan Billingsley 2015 The talented trio that brought you The Perfect Present is back...with summer stories that will brighten your day, warm your heart, and prove that life is one of the greatest teachers there is. In Too Big for Teacups, Gabrielle Simone introduces us to the Fernandez family, who is on their way to Disney for a vacation. Marlena, the oldest, would rather stay home and practice with her dance team. But her parents make her go, and Marlena trudges through a miserable week of what was supposed to be a family bonding experience. In the midst of her complaining, her best friend, Jennifer, helps her learn a valuable life lesson and a new outlook on family time. In Jackie Lee's A Lesson for Summer, 14-year-old twins, Vanessa and Teresa, had planned their ideal summer

vacation. But when their father announces that he's taking over a new church in a new city, the girls find their summer ruined! Instead of spending their days shopping, talking about boys, and going to the movies, they were going to be moving and volunteering to mentor a bunch of snotty-nosed seven-year-olds. The twins do everything in their power to sabotage their parents' plans for them. However, in the end, they learn life lessons that truly make this the perfect summer for both of them. Morgan Billingsley is back with twins, Max and Mickey in A Country Summer. And this time, the suburban duo is unplugging from their iPads, Wi-Fi, and Netflix, to spend the summer with their extended family in a small Arkansas town. This was not at all Mickey's idea of fun. In fact, she hates the boring country and her "classless" relatives. While Max fits right in with his cousins, Mickey soon feels left out and learns a valuable lesson about life - it doesn't matter what you have...what matters is who you

CoCo Boisy G Pitre 2013-12-10

CoCo: The Colorful History of Tandy's Underdog Computer is the first book to document the complete history of the Tandy Color Computer (CoCo), a popular 8-bit PC series from the 1980s that competed against the era's biggest names, including the Apple II, IBM PC, and Commodore 64. The book takes you inside the interesting stories and people behind this unique, underdog computer. Both noted computer science and technology advocates, authors Pitre and Loguidice reveal the story of a pivotal period in the home computing revolution from the perspective

of Tandy's CoCo. As these computers were sold in Radio Shack stores throughout the United States and other countries, they provide a critical point of reference for key events in the unprecedented evolutionary period for the PC industry in the 1980s. The book also features first-hand accounts from the people who created and promoted the CoCo, from the original Tandy executives and engineers to today's active product creators and information keepers. The CoCo impacted many lives, and this book leaves no stone unturned in recounting this fascinating slice of the PC revolution that is still in play today. From early telecommunications experiments to engineering and budgetary challenges, it covers all the aspects that made the CoCo a truly personal, useful computing experience in as small and inexpensive a package as possible.

little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their

various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.
