**Drawings on a Bus** Ellsworth Kelly 2007  
Ellsworth Kelly made the drawings reproduced in this volume in the Fall of 1954. Published for the first time in this sketchbook facsimile, these drawings offer a rare and special glimpse into the distinguished artist's working process at the dawn of his career. The inspiration for the drawings in Sketchbook 23 came to the artist while riding a bus. Inspired by the shadows cast across the pages of a book, the artist took out his pencil and quickly recorded the outlines of the shadows directly onto the pages. Upon returning to his studio, Kelly reached for a sketchbook and began developing the sketches in ink, experimenting with variations, cropping and layering the shadow forms to generate new ones. These black and white drawings became the source material for larger works, including some of the artist's most celebrated canvases, such as *Atlantic* (1956)

purchased by the Whitney Museum of American Art in 1957, the first work by Kelly to enter a museum collection.

### **Violence and Mental Health** Jutta Lindert

2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence

in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

*Principles of Asynchronous Circuit Design*  
Jens Sparsø 2013-04-17 Principles of Asynchronous Circuit Design - A Systems Perspective addresses the need for an introductory text on asynchronous circuit design. Part I is an 8-chapter tutorial which addresses the most important issues for the beginner, including how to think about asynchronous systems. Part II is a 4-chapter introduction to Balsa, a freely-available synthesis system for asynchronous circuits

which will enable the reader to get hands-on experience of designing high-level asynchronous systems. Part III offers a number of examples of state-of-the-art asynchronous systems to illustrate what can be built using asynchronous techniques. The examples range from a complete commercial smart card chip to complex microprocessors. The objective in writing this book has been to enable industrial designers with a background in conventional (clocked) design to be able to understand asynchronous design sufficiently to assess what it has to offer and whether it might be advantageous in their next design task.

**Stolen Treasure** Lachman Mehta  
2012-10-31 Stolen Treasure is a book almost 70 years in the writing! Written over the decades since 1946, this collection of observations, quotes, proverbs, witticisms and rules for living have guided the author since his youth growing up in India, through his time in the Indian Navy, and for the bulk of his life since moving to Ireland in 1960. Now in his mid-80s, the author presents a lifetime of humour and words of wisdom for a happy life in this book. A true treasure collection of one-line gems and snip-bits of life s experiences, the book presents an insight into the observations of life over the author s lifetime that so many of us experience but never document. At first, observations from an idealistic young man are presented. This is followed by wisdom

learned in early adulthood and gathered as an Officer with the Indian Navy. The observations continue from a happy lifetime in Ireland with a large focus on what the author learned about life as a husband and father, as well as engineer and lecturer, to retiree. These have been collected over the years as the author has experienced them in life or overheard them in social occasions, and carefully recorded by hand. In the decades before the internet and social media, these were the original status updates that tell a story of how life and perception of what matters has changed over almost 70 years. An intriguing read for every person of all ages and all interests.

**Stochastic Filtering Theory** G. Kallianpur 2013-04-17 This book is based on a seminar given at the University of California at Los Angeles in the Spring of 1975. The choice of topics reflects my interests at the time and the needs of the students taking the course. Initially the lectures were written up for publication in the Lecture Notes series. However, when I accepted Professor A. V. Balakrishnan's invitation to publish them in the Springer series on Applications of Mathematics it became necessary to alter the informal and often abridged style of the notes and to rewrite or expand much of the original manuscript so as to make the book

as self-contained as possible. Even so, no attempt has been made to write a comprehensive treatise on filtering theory, and the book still follows the original plan of the lectures. While this book was in preparation, the two-volume English translation of the work by R. S. Liptser and A. N. Shiryaev has appeared in this series. The first volume and the present book have the same approach to the subject, viz. that of martingale theory. Liptser and Shiryaev go into greater detail in the discussion of statistical applications and also consider interpolation and extrapolation as well as filtering.

Dalit Households in Village Economies V. K. Ramachandran 2014 Caste is an institution of oppression and social discrimination specific to South Asia, more so to India. Central to the caste system were the status assigned to the Dalit people and the criminal practice of untouchability. Caste is

embedded in production relations. It is an impediment to the growth of the productive forces, and a bulwark against the revolutionary overthrow of the ruling classes. Although there have been, in recent years, new scholarship and new attempts to understand the socio-economic conditions of life of Dalit people and households in India, it is still true, as a leading scholar in the field has written, that 'very few empirical studies have tried to study the phenomenon of economic discrimination'. This book is an attempt to contribute to the study and understanding of economic deprivation and exclusion among Dalits in rural India. The first section deals with poverty and group discrimination. The second section has case studies - from Kerala, Tamil Nadu and West Bengal - on historical aspects of land, caste and social exclusion. The third section deals with contemporary fieldwork-based economic analyses from Tamil Nadu and

Maharashtra. The last section has studies of Dalit households in village economies; the empirical base for these studies comes from the village-level data archive of the Project on Agrarian Relations (PARI) being conducted by the Foundation for Agrarian Studies. The articles in the book are evidence, in some cases, of direct discrimination, and in others of what has been described as differential impact discrimination. Most of all, they reflect cumulative discrimination and disadvantage.
